

Restylane Vital™

A natural beauty treatment
that revitalizes your skin

Restylane
NATURAL BEAUTY. MADE IN SWEDEN

With over nine million treatments worldwide since 1996, Restylane® is one of the leading brands. The Restylane product portfolio comprises six products for facial beauty treatment specially designed to rejuvenate, fill out folds and wrinkles, contour and create volume.

Restylane Vital™ is a beauty treatment that gently and naturally hydrates the skin by supplying hyaluronic acid. It's a pure, crystal-clear gel, and when introduced to the skin in tiny amounts with an extra fine needle, it creates a fresh natural and more youthful appearance.

Restylane Vital can be used in the face, and in other body areas that are important for a youthful, self-confident look – your neck, décolletage and hands. On all these areas Restylane Vital gives your skin a natural vitality that rubs off on the rest of you.

Good looks that last

The benefits of Restylane Vital generally last for months. The gel is based on hyaluronic acid, an essential element to keep your skin firm and youthful. But although its benefits are long lasting, the effects of Restylane Vital are not permanent. You can repeat the treatment as often as you feel necessary, so you will always look and feel your best.

Enhances other beauty treatments

Supplementing Restylane Vital™ with other Restylane® products adds to the facial enhancement effect. This boosts your overall appearance – and the self-confidence that inevitably goes with it.

Pure and gentle, safe and natural

Unlike many skin rejuvenation products, Restylane Vital needs no additives and is produced from a non-animal source. This results in a safe treatment that naturally rejuvenates the skin. Restylane products have been safely used in more than nine million treatments worldwide.

Restylane Vital – proven to restore health to lifeless skin

In a recent study conducted at the University of Hamburg, Restylane Vital was shown to significantly reduce signs of skin aging. Cutaneous elasticity was significantly increased and skin surface roughness was significantly decreased. The result: healthier, smoother, toned skin with an overall revitalized appearance.¹

*When your skin
feels vital, so do you*

Restylane Vital™ gel hydrates your skin, improving its elasticity and tone and creating a naturally fresh and youthful appearance.

And as every woman knows, good looks and self-confidence revitalize both body and soul.
